SUPPORT OUR SCHOOL BUY A PANEL POWER THE FUTURE

Western Springs College – Ngā Puna o Waiōrea are creating a 50 year plus solar power legacy. We invite you to be a part of this through our 'buy a panel' fundraising initiative.

A donation of \$490 will enable the school to purchase and install a state of the art 300 watt panel in the name of your family or business. Your panel will become part of the sustainability and learning fabric of Western Springs College – Ngā Puna o Waiōrea.

Your donation is tax deductible and will be acknowledged on a permanent display within the school.

What will your solar panel deliver?

Your panel will become one of over 200 to be installed, along with a 50kWp solar inverter that has been donated by our partner Mercury. This could reduce our electricity cost by at least 10% - approximately \$15,000 annually. These cost savings will then be directed into other educational benefits for students.

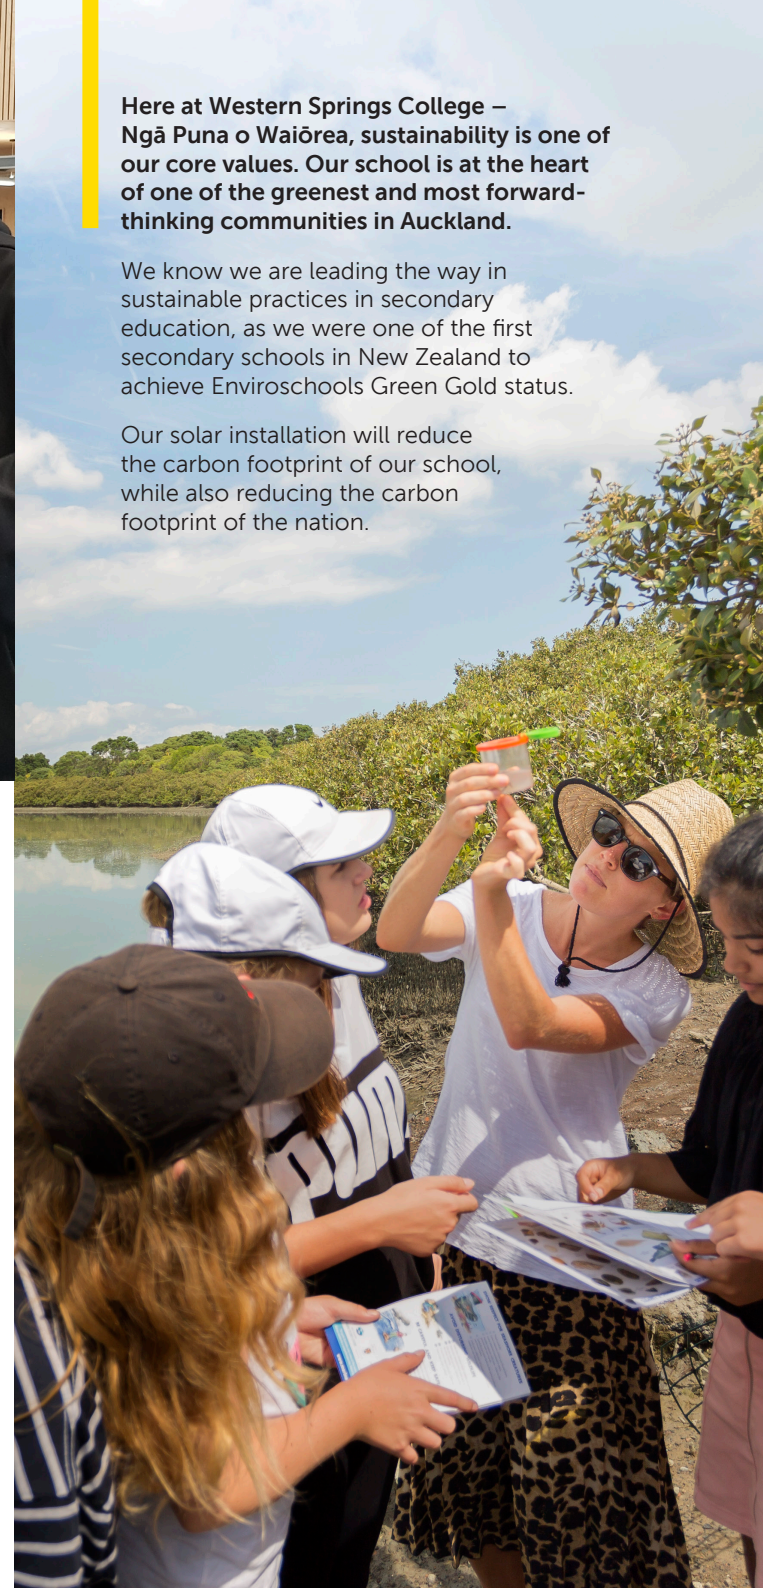

We very much welcome the donation of one or more panels. Consider donating a panel for each of your children or grandchildren. Team up with whānau and friends to buy a panel, any donation is appreciated.

Here at Western Springs College – Ngā Puna o Waiōrea, sustainability is one of our core values. Our school is at the heart of one of the greenest and most forward-thinking communities in Auckland.

We know we are leading the way in sustainable practices in secondary education, as we were one of the first secondary schools in New Zealand to achieve Enviroschools Green Gold status.

Our solar installation will reduce the carbon footprint of our school, while also reducing the carbon footprint of the nation.

Most importantly, our solar journey is about enhancing education.

Expanding our students knowledge and experience of alternative energy and providing a real-time science and learning opportunity, where solar generation and savings can be tracked and studied. Our partnership with Mercury will also give us access to future developments and cutting-edge technologies.

Our students are the leaders and innovators of tomorrow. They will spearhead a shift to a low carbon future. Donate a panel and come along on our energy journey with our students at the centre of the innovation story.
